PROFESSIONAL SUMMARY

Backend Developer with hands-on experience building and deploying production-grade web applications using Python, Django, Django REST Framework (DRF), PostgreSQL, and Redis. Skilled in designing scalable REST APIs, implementing JWT authentication, establishing role-based access control, and enabling real-time communication via WebSockets. Proven ability to integrate third-party APIs (PayPal, Gmail API via OAuth 2.0). Active GitHub contributor seeking Backend/Python-Django roles to leverage technical skills in a fast-paced environment.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Frameworks:** Django, Django REST Framework (DRF), Django Channels
- **Databases:** PostgreSQL, SQLite, Redis
- **Tools & Cloud:** Git, GitHub, Linux, VS Code, Postman, Render, Railway
- **Web/Frontend:** HTML, CSS, Tailwind CSS, Bootstrap
- **Core Concepts:** REST APIs, JWT Auth, Role-Based Access Control (RBAC), WebSockets, OAuth 2.0, Swagger Documentation, Payment Gateway Integration

PROJECTS

Campus Refer – [GitHub Repo](#) | [Live Demo](#)

Technologies: Django, DRF, PostgreSQL, Redis, Django Channels, WebSockets, Tailwind CSS, Render

- Built a full-stack alumni mentorship and job referral platform connecting students with alumni via connection requests, job posts, and resume-based applications.
- Designed role-based access control (RBAC) for Student, Alumni, and Admin roles with separate permission-gated dashboards and API endpoints secured via JWT authentication.
- Implemented real-time notifications and direct messaging using Django Channels, Redis, and WebSockets, requiring zero page refreshes for live updates.
- Developed and Swagger-documented 15+ REST API endpoints covering authentication, job posts, applications, connections, and status updates using DRF.
- Engineered a complete application status pipeline (Applied → Shortlisted → Rejected) alongside resume file uploads and admin moderation tools.

GreatKart – [GitHub Repo](#) | [Live Demo](#)

Technologies: Django, PostgreSQL, Gmail API, OAuth 2.0, PayPal Sandbox, Bootstrap, Render

- Developed a production-ready e-commerce application managing user authentication, dynamic product catalogs, shopping carts, secure checkouts, and order history tracking.
- Integrated the Gmail API with OAuth 2.0 for transactional emails (account verification, password resets), replacing basic SMTP with a secure token-based email flow.
- Implemented PayPal Sandbox for end-to-end payment processing, resulting in seamless success confirmations, invoice-style order detail pages, and automated payment status tracking.
- Architected the platform with modular Django apps, secured environment-based configuration via python-decouple, implemented admin honeypot protection, and deployed to Render with a PostgreSQL database.

EDUCATION

Bachelor of Computer Applications (BCA)

COER University, Roorkee, Uttarakhand

2023 – 2026

Awaiting Results

Class XII (CBSE Board)

Kendriya Vidyalaya No. 2, Roorkee, Uttarakhand

2023

Class X (CBSE Board)

Kendriya Vidyalaya No. 2, Roorkee, Uttarakhand
